And no sooner does the trouble start than curious cats Mrs. Murphy and Pewter, along with corgi Tee Tucker, sink their claws into the case.... After an unexpected rekindling of their romance, Harry and her veterinarian ex-husband, Fair Haristeen, have happily remarried. But the excitement of their nuptials is quickly overshadowed by the murder of Professor Vincent Forland, a world-famous grape and fungal expert who was in town visiting the local vineyards. Within days of giving a lecture on how distilled fungus and cattle diseases are the current basis of chemical warfare, Forland’s decapitated body is discovered. After their initial fright, the residents of Crozet believe that this was a political murder and settle back into their routines—until a local is also found dead, killed in the same gruesome manner as Professor Forland. Now residents can’t help wondering, is this really the work of an outsider—or one of their own? No longer working in the post office, Harry had just planted a quarter acre of grapes, which fuels her natural curiosity over just what the two murder victims knew and had in common. Once the warmth of spring arrives, the grapevines blossom and Harry’s furry entourage discovers the first critical clue. But how can they show the humans what they’ve learned? And how can they—or anyone—stop the killing?

The Intelligencer - Leslie Silbert 2004-02-24

On May 30, 1593, London's most popular playwright was stabbed to death. The royal coroner ruled that Christopher Marlowe was killed in self-defense, but historians have long suspected otherwise, given his role as an "intelligencer" in the queen's secret service. In sixteenth-century London, Marlowe embarks on his final intelligence assignment, hoping to find his missing muse, as well as the culprits behind a high-stakes smuggling scheme. In present-day New York, grad student turned private eye Kate Morgan is called in on an urgent matter. One of her firm's top clients, a London-based financier, has chanced upon a mysterious manuscript that had been buried for centuries -- one that someone, somewhere is desperate to steal. What secret lurks in those yellowed, ciphered pages? And how, so many years later, could it drive someone to kill? As Kate sets off for England, she receives a second assignment. An enigmatic art dealer has made an eleven-million-dollar purchase from an Iranian intelligence officer. Is it a black-market antiquities deal, or something far more sinister? Like Marlowe, Kate moonlights as a spy -- her P.I. firm doubles as an off-the-books U.S. intelligence unit -- and she is soon caught like a pawn in a deadly international game. As The Intelligencer's interlocking narratives race toward a stunning collision, and Kate closes in on the truth behind Marlowe's sudden death, it becomes clear that she may have sealed a similar fate for herself. Propelling us from the shadows of the sixteenth-century underworld to the glitter of Queen Elizabeth's court, from the dark corridors of a clandestine American op-center to the cliffs of Capri, The Intelligencer is at once a murder mystery, a tale of poetic inspiration, and a richly detailed foray into parallel worlds of espionage and political intrigue separated by centuries.

[Perception, Interaction and Language](#) - Felicie D. Affolter 2011-12-21

Perception, Interaction and Language is essentially about the nature of adaptive learning in both its normal and abnormal forms. A major premise is that verbal and nonverbal learning depend critically on interaction with the environment via daily life problem solving activity. This new perspective is not entirely unfamiliar. But, a fundamentally new perspective is offered by the additional premise that tactile-kinesthetic perception associated with problem solving experiences provides the primary basis for interaction and hence, is the root of adaptive learning and development. Although decades have passed since Jean Piaget first proposed a model of cognitive learning and development that builds on sensorimotor processes, little seems to be known about how human actions are actually translated into adaptive behavior. We are keenly reminded of this lack of knowledge when dealing with persons who present abnormal performance. The failure to learn language, in particular, can create a devastating handicap. Therefore, it is not surprising that systematic attention has been given to research and clinical programs for the language disordered.

My Father's Country - Wibke Bruhns 2009-08-11

A huge bestseller in Germany for over a year, *My Father's Country* offers extraordinarily moving and riveting insight into the experience of being German in the last century. On August 26, 1944, Hans Georg Klamroth, officer in the German army and member of the SS, was executed for high treason for his participation in the July 1944 plot to assassinate Hitler. *My Father's Country* is the extraordinary work of Klamroth's daughter, Wibke, born only six years before her father's death. Decades later, Bruhns was watching a TV documentary about the events of July 1944 when images of her father in the court room suddenly appeared on screen. "I stare at this man with the empty face. I don't know him. But I can see myself in him — his eyes are my eyes; I know I resemble him. I know I wouldn't be here without him. And what do I know about him? Nothing at all." Based on an extensive collection of family letters, private diaries, photographs and even menus, *My Father's Country* traces Wibke Bruhns' father's, and more widely, her well-to-do merchant family's, life in the Germany of the late nineteenth and early twentieth centuries. With it, Bruhns not only brings to life the nuances of this world — its culture and its assumptions, politics and beliefs — but also comes to know, finally, the mysterious father she barely remembers.
