The Nuclear Crisis - Christoph Becker-Schaum 2016-10-01

In 1983, more than one million Germans joined together to protest NATO’s deployment of nuclear missiles in Europe. International media overflowed with images of marches, rallies, and human chains as protesters blockaded depots and agitated for disarmament. Though they failed to halt the deployment, the episode was a

decisive one for German society, revealing deep divisions in the nation's political culture while continuing to mobilize activists. This volume provides a comprehensive reference work on the "Euromissiles" crisis as experienced by its various protagonists, analyzing NATO's diplomatic and military maneuvering and tracing the political, cultural, and moral discourses that surrounded the missiles' deployment in East and West Germany.

Crisis Services: Effectiveness, Cost-Effectiveness, and Funding Strategies - U.S.

Department of Health and Human Services 2019-11-23
Crisis Services are a continuum of services that are provided to individuals experiencing a psychiatric emergency. The primary goal of these services is to stabilize and improve psychological symptoms of distress and to engage

individuals in an appropriate treatment service to address the problem that led to the crisis. Core crisis services include: 23-hour crisis stabilization/observation beds, short term crisis residential services and crisis stabilization, mobile crisis services, 24/7 crisis hotlines, warm lines, psychiatric advance directive statements, and peer crisis services. The research base on the effectiveness of crisis services is growing. There is evidence that crisis stabilization, community-based residential crisis care, and mobile crisis services can divert individuals from unnecessary hospitalizations and ensure the least restrictive treatment option is available to people experiencing behavioral health crises.

Generalist Social Work Practice - Janice Gasker 2018-10-17

Generalist Social Work Practice provides students with the foundational skills and knowledge needed to serve clients across micro, mezzo and macro areas of practice.

Author Janice Gasker brings a focus on self-reflection as the first stage in the planned change process and writes with the perspective that we consider work at all levels of practice simultaneously rather than in isolation. In accordance with the 2015 Educational Policy and Accreditation Standards (EPAS) set forth by the Council of Social Work

Education (CSWE), the planned change process is presented as dynamic and interactive, providing students with a clear understanding of how each stage of the planned change process can be utilized at any point when serving a client system. The text spotlights the distinctive characteristics of the worker—their values, attitudes, and experiences—that may influence client interaction.

The text also includes case studies, collaborative learning exercises, and critical thinking questions to help students apply concepts to practice. Resources in Education - 1998

Crisis Intervention Team

(CIT) - Methods for Using Data to Inform Practice: A Step-by-Step Guide - U.S. Department of Health and Human Services 2019-03-17
The Crisis Intervention Team (CIT) program has become a globally recognized model for safely and effectively assisting people with mental and substance use disorders who experience crises in the community. The CIT Model promotes strong community partnerships among law enforcement, behavioral health providers, people with mental and substance use disorders, along with their families and others. While law enforcement agencies have a central role in program development and ongoing operations, a continuum of crisis services available to citizens prior to police involvement is part of the model. These other community services (e.g., mobile crisis teams, crisis phone lines) are essential for avoiding criminal justice system involvement for those with behavioral health challenges ? a goal of CIT

programs (Steadman & Morrissette, 2016). CIT is just one part of a robust continuum of behavioral health services for the whole community.

The Comfort Garden: Tales from the Trauma Unit When the Caregiver Needs Solace
The Comfort Garden is Laurie Barkin's account of the five years she worked as a psychiatric nurse on the

surgical/trauma unit at San Francisco General Hospital. Told against the backdrop of patients who survived motor vehicle accidents, falls, fires, fists, bullets, and knives, The Comfort Garden is a metaphor for the emotional support caregivers need. The story illuminates the issues of compassion fatigue and vicarious trauma that may develop in caregivers when exposure to tragedy becomes routine. The Comfort Garden will appeal to health care professionals, firefighters, police, war veterans, social workers, journalists, students, and anyone whose life is touched by trauma. "The Comfort Garden reveals the real world of human-to-human caring at its highest level." Jean Watson, RN, PhD, author of *Human Caring Science: A Theory of Nursing* "Laurie is that rare health professional with a gift for narrative and a story to tell. This is an important book for any health care worker, but especially for those of us who consider ourselves traumatic stress

specialists. It reinforces the values and the spirit that brought us into the field. And it reminds us of the obstacles we face every day: human cruelty, social injustice, dwindling resources. Read this. You'll be better for it." Frank M Ochberg MD, Clinical Professor of Psychiatry, Michigan State University Laurie Barkin "sensitively documents the process of vicarious trauma how caregivers like herself internalize their patients trauma." San Francisco Chronicle "In an age when hospitals have been turning to quicker-acting medications, faster discharges, and fewer deep and meaningful conversations with patients, Laurie Barkin takes the opposite position. She urges us to make the time to use our knowledge of psychodynamic psychotherapy to help traumatized people early in the course of their distress." Lenore Terr MD, psychiatrist, author of Too Scared to Cry "Whenever we walk into a hospital or a doctor's office we often assume that the patients

are somehow broken, sick or frightened and that the nurses and doctors are whole, healthy and brave. In stories that prove these assumptions false, Laurie Barkin shows us how permeable the line actually is between the cared for and the caregiver." Cortney Davis, author of The Heart's Truth: Essays on the Art of Nursing **Empowerment Series: Understanding Human Behavior and the Social Environment** - Charles Zastrow 2019-01-31 UNDERSTANDING HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT, 11th Edition, looks at the lifespan through the lens of social work theory and practice, covering human development and behavior theories within the context of individual, family, group, organizational, and community systems. Using a chronological lifespan approach, the book presents separate chapters on biological, psychological, and social impacts at the different lifespan stages with an emphasis on strengths and empowerment. Part of the

Brooks/Cole Empowerment Series, this edition is up to date and thoroughly integrates the core competencies and recommended behaviors outlined in the current Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE). Improving Police Response to Persons with Mental Illness - Thomas Joseph

Jurkanin 2007

The Ghostbusters refrain "Who you gonna call?" typically connotes a lighthearted response to an unusual problem, but in the context of a human being suffering a mental health crisis, the refrain is anything but lighthearted. In an ideal world, "who you gonna call" would be a trained mental health professional. In the real world, the cry for help is usually received by the police. Police respond because there is no one else to assist. Police

officers rank mental health crisis situations as far more stressful than crimes in progress. A person, suffering from mental illness is, by definition, not fully rational. Although they are likewise not fully irrational, behavior is unpredictable, and unpredictable behavior for the police is potentially dangerous behavior. As a consequence, outcomes of engagement between law enforcement and mental health consumers are too often tragic. No organization is more concerned about inadequate response than the police themselves. Improving Police Response to Mental Illness provides best practices guidance. A national pool of experts provide both insight and recommendations, ranging from the conceptual, Atypical Situations-Atypical Responses, to the pragmatic, Law Enforcement Training Models. Written specifically for the book, each chapter addresses a given critical component, including social policy, police response alternatives, training, legal

constraints, and cooperative agreements with mental health service providers. This is an indispensable volume on the subject of police and mental health and is designed for police practitioners, mental health professionals, and scholars of social policy.

The SAFER-R Model - George Everly, Jr. 2017-04
Psychological Crisis Intervention: The SAFER-R Model is designed to provide the reader with a simple set of guidelines for the provision of psychological first aid (PFA). The model of psychological first aid (PFA) for individuals presented in this volume is the SAFER-R model developed by the authors. Arguably it is the most widely used tactical model of crisis intervention in the world with roughly 1 million individuals trained in its operational and derivative guidelines. This model of PFA

is not a therapy model nor a substitute for therapy. Rather it is designed to help crisis interventionists stabilize and mitigate acute crisis reactions in individuals, as opposed to groups. Guidelines for triage and referrals are also provided. Before plunging into the step-by-step guidelines, a brief history and terminological framework is provided. Lastly, recommendations for addressing specific psychological challenges (suicidal ideation, resistance to seeking professional psychological support, and depression) are provided.

**The Balkan Peace Team
1994-2001** - Barbara Müller

2012-02-13

Jorgen Johansen (Peace Activist, Trainer and Researcher, with expertise in the conflicts in Colombia, India, Congo, Cameroon, China, Palestine, Israel, Indonesia, and other areas) writes on this book: "The international peace movement changed its strategy in the early nineties. From mainly working in their own countries members moved into the war zones in large numbers. This had been done earlier, but not on such a large scale. The new context rendered most of their experiences out of date. Many tried and some failed. It was obviously not enough to be armed with good intentions. What was functioning well outside US Embassies or in their home constituencies could not be copied on the battlefields. In order to learn from these new types of intervention and improve organisation for coming campaigns, it is crucial to soberly evaluate newly gained experience. Barbara Müller has studied the Balkan Peace Team

and its work in Croatia, Serbia and Kosovo. The present book presents a critical and thorough evaluation of this important project. In a true 'Gandhian' tradition, the author takes the reader on a tour through this "experiment with the truth". This is far from being a list of ovations for the volunteers who spent years in the Balkans doing their best. The most useful parts of the present book are the detailed descriptions of the complexity and difficulties facing such projects. Organised by a number of peace organisations from different backgrounds and cultures, and run by a similar diversity of people each in their own particular field, it should not come as a surprise to anyone to realise that the difficulties were numerous. And to work in a war zone obviously adds to the list of challenges. All in all, the Balkan Peace Team did a great job and it deserves the recognition found in this detailed documentation and critical examination. No organisation should venture to

plan such a project without first reading this important book. Neither should any volunteers be sent to a conflict area without having this book on their obligatory assignments list."

EPA 608 Study Guide - Hvac Training 101 2019-12-06
HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the

information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

Textbook of Hospital Psychiatry, Second Edition -

Edited by Harsh K. Trivedi, M.D., M.B.A. 2022-10-03

"When it was originally published in 2009, the Textbook of Hospital Psychiatry was the first comprehensive guide to hit the market in more than a decade. This updated edition includes new material in each of the 30 chapters, with a focus on treatment, staffing, and quality of care changes, and includes new, forward-looking chapters on consumer and family perspectives, collaborative care, measurement-based care, safety, and more. Providers and policymakers agree that integrating behavioral treatments into regular courses of patient care helps address post-discharge needs, including safe housing, reliable transportation, and nutrition. Behavioral wellness is currently benefitting from increased public attention, but disparities in access continue. There is a significant need for dedicated psychiatric hospitals

and dedicated units in general hospitals to meet America's mental health needs. Progress is happening, but many familiar challenges remain. Inadequate healthcare coverage and reimbursement for services has left both patients and medical providers desperate for reform. Staffing shortages are worsening as practitioners in the baby boomer generation retire and those roles go unfilled by new graduates. Despite these challenges, psychiatric hospitals continue to evolve and discover new solutions to provide transformative care for patients. This updated textbook contains valuable knowledge and novel insights for clinicians regarding treatment, staffing, and care, and features new chapters on family involvement and safety, federal and local financing, and information on collaborative care and LEAN. Forward-looking chapters focus on the integration of treatment across settings and providers and examine new strategies such as telemedicine to extend the reach of clinicians.

Together, and with expert guidance, readers of this must-have resource will find a roadmap for clinical, administrative, and financial steps to help providers take advantage of these unprecedented times to develop services and advance hospital psychiatry in the United States"--

Doing Comparative Case Studies - Frances Vavrus

Comparative Case Studies: New Designs and Directions extends the comparative case study methodology established by Bartlett and Vavrus and employed in many areas of social research, especially in education. This volume unites a diverse, international group of education scholars whose work exemplifies the affordances and constraints of the comparative case study (CCS) approach and offers new theoretical and empirical directions for researchers. In 11 engaging chapters, experts in comparative education, early childhood education, peace education, refugee education, special education, and teacher education discuss their use of the CCS approach to produce new ways of knowing and to

address challenges of multi-scalar and multi-sited research. The first section, Conceptualizing Cases and Case Selection, emphasizes the importance of carefully selecting cases during different phases of research while continuously reflecting on how these choices influence the findings. The second section, Balancing Specificity and Generalizability, addresses the challenge of balancing the need for rich, deep data while including multiple sites. The third section, Enabling Processual Analysis across Sites and Scales, demonstrates the fit between the CCS approach and qualitative research that unfolds over time and space. Addressing the Transversal Axis, the fourth section, showcases research with a strong temporal dimension. The final section, New Directions, suggests inspiring and innovative methods. Offering rich methodological examples and provocative discussion questions, this volume will appeal to undergraduate and

graduate students in education and research design courses, and to scholars and policymakers in diverse fields seeking to design studies of complex phenomena at different sites and scales. *Child Protective Services* - Diane DePanfilis 2003 From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and

administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including:

Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.
