Frankie's World: A Graphic Novel - Aoife Dooley 2022-08-02

From acclaimed Autistic Irish comedian Aoife Dooley comes a fresh and funny debut middle-grade graphic novel about fitting in and standing out. Frankie is different from everyone in her class, and she can't figure out why. She has trouble concentrating, and her classmates tease her for not having a dad at home. To try to make sense of the world, Frankie doodles her daily adventures in a journal. One day, when Frankie sneaks into her mom's room and sees her biological father's name on her birth certificate, she decides to go on a mission to track him down. Could Frankie's father be the key to finding out why Frankie feels so adrift? A unique story told with a light touch and an abundance of warmth and wit, Frankie's World is laugh-out-loud funny and a love letter to daring to be different.

Printer's Devil Court - Susan Hill 2014-09-25

Ideally spooky Halloween reading... A chilling ghost story by the author of *The Woman in Black*. One murky November evening after a satisfying meal in their Fleet Street lodgings, a conversation between four medical students takes a curious turn and Hugh is initiated into a dark secret. In the cellar of their narrow lodgings in Printer's Devil Court and a little used mortuary in a subterranean annex of the hospital, they have begun to interfere with death itself, in shadowy experiments beyond the realms of medical ethics. They call on Hugh to witness an event both extraordinary and terrifying. Years later, Hugh has occasion to return to his student digs and the familiar surroundings resurrect peculiar and unpleasant memories of these unnatural events, the true horror of which only slowly becomes apparent.

A History of France - John Julius Norwich 2018-10-02

An "engaging, enthusiastic, sympathetic, funny" journey through French history from the New York Times bestselling author of *Absolute Monarchs* (The Wall Street Journal). Beginning with Julius Caesar's conquest of Gaul in the first century BC, this study of French history comprises a cast of legendary characters—Charlemagne, Louis XIV, Napoleon, Joan of Arc, and Marie Antoinette, to name a few—as John Julius Norwich chronicles France's often violent, always fascinating history. From the French Revolution—after which neither France nor the world would be the same again—to the storming of the Bastille, from the Vichy regime and the Resistance to the end of the Second World War, *A History of France* is packed with heroes and villains, battles and rebellion—written with both an expert command of detail and a lively appreciation for the subject matter by this "true master of narrative history" (Simon Sebag Montefiore).

The Bunker Diary - Kevin Brooks 2019-08-06

I can't believe I fell for it. It was still dark when I woke up this morning. As soon as my eyes opened I knew where I was. A low-ceilinged rectangular building made entirely of whitewashed concrete. There are six little rooms along the main corridor. There are no windows. No doors. The elevator is the only way in or out. What's he going to do to me? What am I going to do? People are really quite simple, and they have simple needs. Food, water, light, space, privacy. Maybe a small measure of dignity. A bit of freedom. What happens when someone simply takes all that away?

Stochastic Coalgebraic Logic - Ernst-Erich Doberkat 2009-12-24

Coalgebraic logic is an important research topic in the areas of concurrency theory, semantics, transition systems and modal logics. It provides a general approach to modeling systems, allowing us to apply important results from coalgebras, universal algebra and category theory in novel ways. Stochastic systems provide important tools for systems modeling, and recent work shows that categorical reasoning may lead to new insights, previously not available in a purely probabilistic setting. This book combines coalgebraic reasoning, stochastic systems and logics. It provides an insight into the principles of coalgebraic logic from a categorical point of view, and applies these systems to interpretations of stochastic coalgebraic logics, which include well-known modal logics and continuous time branching logics. The author introduces stochastic systems together with their probabilistic and categorical foundations and gives a comprehensive discussion of the Giry monad as the underlying categorical construction, presenting many new, hitherto unpublished results. He discusses modal logics, introduces their probabilistic interpretations, and then proceeds to an analysis of Kripke models for coalgebraic logics. The book will be of interest to researchers in theoretical computer science, logic and category theory.

Mister Pip - Lloyd Jones 2009-02-24

After the trouble starts and the soldiers arrive on Matilda's island, only one white person stays behind. Mr. Watts, whom the kids call Pop Eye, wears a red nose and pulls his wife around on a trolley, and he steps in to teach the children when there is no one else. His only lessons consist of reading from his battered copy of *Great Expectations*, a book by his friend Mr. Dickens. For Matilda, Dickens's hero Pip becomes as real to her as her own mother, and the greatest friendship of her life has begun. Soon Mr. Watts's book begins to inflame the children's imaginations with dreams about Dickens's London and the larger world. But how will they answer when the soldiers demand to know: where is this man named Pip? Set against the stunning beauty of Bougainville in the South Pacific during the civil war in the early 1990s, Lloyd Jones's breathtaking novel shows what magic a child's imagination makes possible even in the face of terrible violence and what power stories have to fuel the imagination.

Death of a Hero - Richard Aldington 2013-02-26

One of the great World War I antiwar novels—honest, chilling, and brilliantly satirical Based on the author's experiences on the Western Front, Richard Aldington's first novel, *Death of a Hero*, finally joins the ranks of Penguin Classics. Our hero is George Winterbourne, who enlists in the British Expeditionary Army during the Great War and gets sent to France. After a rash of casualties leads to his promotion through the ranks, he grows increasingly cynical about the war and disillusioned by the hypocrisies of British society.

Aldington's writing about Britain's ignorance of the tribulations of its soldiers is among the most biting ever published. *Death of a Hero* vividly evokes the morally degrading nature of combat as it rushes toward its astounding finish. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Montessori Madness - Trevor Eissler 2009

"We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. *Montessori Madness!* explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what education should look like will never be the same"--Back cover.

The Psychology of Education - Martyn Long 2010-11-05

Written in an accessible and engaging style, this second edition of *The Psychology of Education* addresses key concepts from psychology which relate to education. Throughout the text the author team emphasise an evidence-based approach, providing practical suggestions to improve learning outcomes, while fictional case studies are used in this new edition to provide students with a sense of what psychological issues can look like in the classroom. Activities around these case studies give students the chance to think about how to apply their theoretical knowledge to these real-world contexts. 'Key implications' are drawn out at appropriate points, and throughout the book students are provided with strategies for interrogating evidence. Key terms are glossed throughout the book and chapters are summarised and followed by suggestions for further reading. A chapter on Learning interactions and social worlds is new to this edition. The following chapters have all been extensively updated: Learning Assessment Individual differences and achievement Student engagement and motivation The educational context Society and culture Language Literacy Inclusive education and special educational needs Behaviour problems Dealing with behaviour problems. This book is essential reading for undergraduate students of Education Studies and Psychology as well as trainee teachers on BA, BEd and PGCE courses. It will also be of use to postgraduates training to be educational psychologists.

Art & Science - J. Paul Getty Museum 2013-07-23

For the first time, the award-winning Education Department of the J. Paul Getty Museum is making one of its much-lauded K-12 curricula available nationwide in an attractive and inexpensive print format. Art & Science was developed by the Getty's expert educators, scientists, curators, and conservators, and tested by classroom teachers, and it connects to national and California state standards. Teachers and parents will find engaging lessons and activities divided into beginning, intermediate, and advanced levels for step-by-step learning. Art & Science mines the treasures of the Getty Museum to explore the many intersections of the visual arts with scientific disciplines. Full-color images of antiquities, decorative arts, drawings, manuscripts, painting, photography, and sculpture illuminate lesson plans about, for example: • The laws of physics that keep a bronze sculpture of a juggler from tipping over • The science that allows photographers to manipulate light and capture images on paper • The processes of radiation and convection that turn clay into porcelain • Scientific observation of the natural world as the subject for art • How scientists removed 2,000 years of oxidation and encrustation to reveal a priceless ancient sculpture The curriculum also contains a trove of resources, including handouts, "Questions for Teaching," a timeline, glossary, and list of print and web sources for further research. There are also links to additional related lessons and images available on the Getty website. The full-page color images and special "lay flat" binding of Art & Science make it ideal for use with a digital document reader.

Environmental Epidemiology - Rodolfo Saracci 2019-06-04

Published in 1996: Environmental Epidemiology: Exposure and Disease is a unique resource identifying priorities for public health research in selected areas of environmental epidemiology. Drawn from the proceedings of an international workshop on this topic, the book is a compilation of the specialized knowledge and opinions of environmental epidemiology experts. Organized by the Rome division of the World Health Organization (WHO) European Centre for Environment and Health, the goal of the 1993

workshop, Setting Priorities in Environmental Epidemiology, was to establish a consensus among the experts in the selected areas. The chapters in Environmental Epidemiology: Exposure and Disease cover environmental epidemiology from three different viewpoints: environmental exposures, major disease groups related to the environment, and epidemiological methodology. The environmental exposure categories examined for prioritizing are air contaminants, water contaminants, and ionizing and non-ionizing radiation exposure from human-caused disasters. .

Peppa Pig: Recycling Fun - Read It Yourself with Ladybird - Lorraine Horsley 2013

Peppa Pig and her family are having fun sorting and recycling their rubbish. Miss Rabbit is having fun recycling, too, until she tries to recycle something she shouldn't! Read it yourself with Ladybird is one of Ladybird's best-selling series. For over thirty-five years it has helped young children who are learning to read develop and improve their reading skills. Each Read it yourself book is very carefully written to include many key, high-frequency words that are vital for learning to read, as well as a limited number of story words that are introduced and practised throughout. Simple sentences and frequently repeated words help to build the confidence of beginner readers and the four different levels of books support children all the way from very first reading practice through to independent, fluent reading. Each book has been carefully checked by educational consultants and can be read independently at home or used in a guided reading session at school. Further content includes comprehension puzzles, helpful notes for parents, carers and teachers, and book band information for use in schools. Peppa Pig: Recycling Fun is a Level 1 Read it yourself title, suitable for very early readers who have had some initial reading instruction and are ready to take their first steps in reading real stories. Each story is told very simply, using a small number of frequently repeated words.

Feedback Pendulum - Michael Chiles 2021-01-08

In the words of Bill Gates, 'We all need people who give us feedback. That's how we improve.' The art of giving feedback is widely recognised as one of the most powerful tools in education and equally one of the most variable aspects in the way it is applied. In *The Feedback Pendulum*, Michael aims to explore how the use of feedback has evolved over time, drawing on a combination of research and sharing experiences, and examples of best practices across the different phases of education to establish a culture of efficient and

effective feedback that supports the teaching and learning cycle. This book will unpick the research, the experience of expert practitioners, and practical strategies in the different phases of education, including: the evolution of feedback over time; pre-school feedback; primary and secondary school feedback; specialist education feedback; parental feedback; and CPD feedback. Through the use of spotlights from teachers and an education psychologist's perspective interweaved throughout, Michael provides a manifesto for enhancing feedback in education.
