Fake Photos - Hany Farid 2019-09-10

A concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Stalin, Mao, Hitler, Mussolini, and other dictators routinely doctored photographs so that the images aligned with their messages. They erased people who were there, added people who were not, and manipulated backgrounds. They knew if they changed the visual record, they could change history. Once, altering images required hours in the darkroom; today, it can be done with a keyboard and mouse. Because photographs are so easily faked, fake photos are everywhere—supermarket tabloids, fashion magazines, political ads, and social media. How can we tell if an image is real or false? In this volume in the MIT Press Essential Knowledge series, Hany Farid offers a concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Farid, an expert in photo forensics, has spent two decades developing techniques for authenticating digital images. These techniques model the entire image-creation process in order to find the digital disruption introduced by manipulation of the image. Each section of the book describes a different technique for analyzing an image, beginning with those requiring minimal technical expertise and advancing to those at intermediate and higher levels. There are techniques for, among other things, reverse image searches, metadata analysis, finding image imperfections introduced by JPEG compression, image cloning, tracing pixel patterns, and detecting images that are computer generated. In each section, Farid describes the techniques, explains when they should be applied, and offers examples of image analysis.

The Image of the City - Kevin Lynch 1964-06-15

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

That Tree - 2013-09-15

(As seen on CBS News Sunday Morning with Charles Osgood) Trees resonate deeply in the souls of millions of people. A lonely bur oak in the middle of a southwest Wisconsin cornfield spoke to photographer Mark Hirsch. That Tree spoke of hidden beauty and hope. It spoke of patience and dedication. It even gave him personal healing he wasn't aware he needed. Thus every day for the next year Hirsch would quietly attempt to coax the stories from That Tree. Hirsch, after purchasing his first iPhone, scoffed at the idea that a professional photographer would find the camera inside his new phone interesting in any way. A good friend goaded him into trying it and one day in the middle of a January snow storm Hirsch took his first picture of That Tree. He'd driven past That Tree every day for 19 years and never took a picture. That would change. Now a passionate Facebook following of 33,000+ people look for Hirsch's daily picture of That Tree and countless media outlets have featured Hirsch's story including NPR, NBC News, Le Monde, The Guardian, Sierra Club, Chicago Tribune, Denver Post, San Francisco Chronicle, and many more. That Tree is hardcover, 192 pages, measuring 10x10 inches and is published by Press Syndication Group. 2013.

Florence Mills - Bill Egan 2004

This biography reveals the lost history of the life of the 1920s Black female international superstar. Mills was lionized by the crowned heads in Europe and opened doors for generations of Black female stars from Lena Horne to Diana Ross. Although her career and shows changed the nature of Black entertainment, and thereby the wider American popular culture, she was largely forgotten in later years. Anyone who wants to understand the history of Black entertainment from Bert Williams to Michael Jackson and, by implication, the history of American popular culture, needs to understand the ways in which Florence Mills changed the rules forever.

Camera Lucida - Roland Barthes 1981

"Examining the themes of presence and absence, the relationship between photography and theatre, history and death, these 'reflections on photography' begin as an investigation into the nature of photographs. Then, as Barthes contemplates a photograph of his mother as a child, the book becomes an exposition of his own mind."--Alibris.

Heat Islands - Lisa Mummery Gartland 2012-05-16

Heat islands are urban and suburban areas that are significantly warmer than their surroundings. Traditional, highly absorptive construction materials and a lack of effective landscaping are their main causes. Heat island problems, in terms of increased energy consumption, reduced air quality and effects on human health and mortality, are becoming more pressing as cities continue to grow and sprawl. This comprehensive book brings together the latest information about heat islands and their mitigation. The book describes how heat islands are formed, what problems they cause, which technologies mitigate heat island effects and what policies and actions can be taken to cool communities. Internationally renowned expert Lisa Gartland offers a comprehensive source of information for turning heat islands into cool communities. The author includes sections on cool roofing and cool paving, explains their benefits in detail and provides practical guidelines for their selection and installation. The book also reviews how and why to incorporate trees and vegetation around buildings, in parking lots and on green roofs.

La famille dans le Proche-Orient ancien: réalités, symbolismes et images - Lionel Marti 2014-07-08

In July, 2009, the International Association for Assyriology met in Paris, France, for 5 days to deliver and listen to papers on the theme "La famille dans le Proche-Orient." This volume, the proceedings of the conference, contains 53 of the papers read at the 55th annual Rencontre, including primarily papers directly connected with the theme and some on areas of related interest. The papers covered every period of Mesopotamian history, from the third millennium through the end of the first millennium B.C.E. The photo on the back cover shows only a representative portion of the attendees, who were warmly hosted by faculty and students from the Collège de France.
