The Talmud in Dispute During the High Middle Ages - Fidora, Alexander 2019-12-17

The Christian discovery of the Babylonian Talmud is a significant landmark in the long and complex history of anti-Jewish polemic. While the Talmudic corpus developed in the same period as early Christianity, this post-biblical text was largely unknown to the Christians. Full awareness of the Talmud among Christian authors did not arise until the

late 1230s, when the Jewish convert Nicholas Donin presented a Latin translation of Talmudic fragments to Pope Gregory IX. Though the Talmud was subsequently put on trial (1240) and burnt (1241/2) in Paris, the controversy surrounding it continued over the following years, as Pope Innocent IV called for a revision of its condemnation. The textual basis for this revision is the *Extractiones de Talmud*, that is, a Latin translation of 1.922 Talmudic fragments. The articles in this volume shed new light on this monumental translation and its historical context. They also offer critical editions of related texts, such as Donin's anti-Talmudic polemic. Authors of the contributions are: Wout van Bekkum, Piero Capelli, Ulisse Cecini, Enric Cortès, Óscar de la Cruz Palma, Federico Dal Bo, Alexander Fidora, Gorge K. Hasselhoff, Moisés Orfali, Ursula Ragacs and Eulàlia Vernet i Pons.

It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Is social media destroying democracy? Are Russian propaganda or "Fake news" entrepreneurs on Facebook undermining our sense of a shared reality? A conventional wisdom has emerged since the election of Donald Trump in 2016 that new technologies and their manipulation by foreign actors played a decisive role in his victory and are responsible for the sense of a "post-truth" moment in which disinformation and propaganda thrives. Network Propaganda challenges that received wisdom through the most comprehensive study yet published on media coverage of American presidential politics from the start of the election cycle in April 2015 to the one year anniversary of the Trump presidency. Analysing millions of news stories together with Twitter and Facebook shares, broadcast television and YouTube, the book provides a comprehensive overview of the architecture of contemporary American political communications. Through data analysis and detailed qualitative case studies of coverage of immigration, Clinton scandals, and the Trump Russia investigation, the book finds that the right-wing media ecosystem operates fundamentally differently than the rest of the media environment. The authors argue that longstanding institutional, political, and cultural patterns in American politics interacted with technological change since the 1970s to create a propaganda feedback loop in American conservative media. This dynamic has marginalized centre-right media and politicians, radicalized the right wing ecosystem, and rendered it susceptible to propaganda efforts, foreign and domestic. For readers outside the United States, the book offers a new perspective and methods for diagnosing the sources of, and potential solutions for, the perceived global crisis of democratic politics.

Handbook of Multilingualism and Multiculturalism - Geneviève Zarate 2011
Built around the concept of linguistic and cultural plurality, this book defines language as an instrument of action and symbolic power. Plurality is conceived here as : a complex array of voices, perspectives and approaches that seeks to preserve the complexity of the multilingual and multicultural enterprise, including language learning and teaching ; a coherent system of relationships among various languages, research traditions and research sites that informs qualitative methods of inquiry into multilingualism and its uses in everyday life ; a view of language as structured sociohistorical object, observable from several simultaneous spatiotemporal standpoints, such as that of daily interactions or that

which sustains the symbolic power of institutions. This book is addressed to teacher trainers, young researchers, decision makers, teachers concerned with the role of languages in the evolution of societies and educational systems. It aims to elicit discussion by articulating practices, field observations and analyses based on a multidisciplinary conceptual framework.

Les territoires de la violence à Jakarta - Jérôme Tadié 2006
Comment la violence peut-elle modeler des espaces, à Jakarta par exemple ? Même s'il n'y existe pas de ghettos impénétrables, la capitale est considérée comme dangereuse. L'analyse des relations entre l'appropriation des territoires urbains et les modes de violence qui s'y déploient fait ressortir la manière dont une grande métropole est gouvernée, de façon officielle ou informelle.
