Shakespeare's Language in Digital Media - Janelle Jenstad 2017-12-22

The authors of this book ask how digital research tools are changing the ways in which practicing editors historicize Shakespeare's language. Scholars now encounter, interpret, and disseminate Shakespeare's language through an increasing variety of digital resources, including online editions such as the Internet Shakespeare Editions (ISE), searchable lexical corpora such as the Early English Books Online-Text Creation Partnership (EEBO-TCP) or the Lexicons of Early Modern English (LEME) collections, high-quality digital facsimiles such as the Folger Shakespeare Library's Digital Image Collection, text visualization tools such as Voyant, apps for reading and editing on mobile devices, and more. What new insights do these tools offer about the ways Shakespeare's words made meaning in their own time? What kinds of historical or historicizing arguments can digital editions make about Shakespeare's language? A growing body of work in the digital humanities allows textual critics to explore new approaches to editing in digital environments, and enables language historians to ask and answer new questions about Shakespeare's words. The authors in this unique book explicitly bring together the two fields of textual criticism and language history in an exploration of the ways in which new tools are expanding our understanding of Early Modern English. *Lost Enlightenment* - S. Frederick Starr

2015-06-02

The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. *Lost Enlightenment* recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared

at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. *Lost Enlightenment* chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

*Violet Bent Backwards Over the Grass* - Lana Del Rey  
2020-09-29

The New York Times bestselling debut book of poetry from Lana Del Rey, *Violet Bent Backwards Over the Grass*. "Violet Bent Backwards Over the Grass is the title poem of the book and the first poem I wrote of many. Some of which came to me in their entirety, which I dictated and then typed out, and some that I worked laboriously picking apart each word to make the perfect poem. They are eclectic and honest and not trying to be anything other than what they are and for that reason I'm proud of them, especially because the spirit in which they were written was very authentic."

—Lana Del Rey Lana's breathtaking first book solidifies her further as "the essential writer of her times" (The Atlantic). The collection features more than thirty poems, many exclusive to the book: *Never to Heaven*, *The Land of 1,000 Fires*, *Past the Bushes Cypress Thriving*, *LA Who Am I to Love You?*, *Tessa DiPietro*, *Happy*, *Paradise Is Very Fragile*, *Bare Feet on Linoleum*, and many more. This beautiful hardcover edition showcases Lana's typewritten manuscript pages alongside her original photography. The result is an extraordinary poetic landscape that reflects the unguarded spirit of its creator. *Violet Bent Backwards Over the Grass* is also brought to life in an unprecedented spoken word audiobook which features Lana Del Rey reading fourteen

**Post-Imperium** - Dmitri V. Trenin 2011-08-01  
The war in Georgia. Tensions with Ukraine and other nearby countries. Moscow's bid to consolidate its "zone of privileged interests" among the Commonwealth of Independent States. These volatile situations all raise questions about the nature of and prospects for Russia's relations with its neighbors. In this book, Carnegie scholar Dmitri Trenin argues that Moscow needs to drop the notion of creating an exclusive power center out of the post-Soviet space. Like other former European empires, Russia will need to reinvent itself as a global player and as part of a wider community. Trenin's vision of Russia is an open Euro-Pacific country that is savvy in its use of soft power and fully reconciled with its former borderlands and dependents. He acknowledges that this scenario may sound too optimistic but warns that the alternative is not a new version of the historic empire but instead is the ultimate marginalization of Russia.

*How Are We to Live?* - Peter Singer 2010-03-19

Is there still anything worth living for? Is anything worth pursuing, apart from money, love, and caring for one's own family? Internationally known social philosopher and ethicist Peter Singer has an answer to these and other questions in this compelling new volume. If we can detach ourselves from our own immediate preoccupations and look at the world as a whole and our place in it, there is something absurd about the idea that people should have trouble finding something to live for. Singer suggests that people who take an ethical approach to life often avoid the trap of meaninglessness, finding a deeper satisfaction in what they are doing than those people whose goals are narrower and more self-centered. He spells out what he means by an ethical approach to life, and shows that it can bring about significant and far-reaching changes to one's life. After completing each section, the reader will be compelled to stop and ponder for a while.

-San Antonio Current. . . extremely well written.  
-Mind (UK) Imagine that you could choose a book that everyone in the world would read. My choice would be this book by Peter Singer. It is a good philosophy book, which covers many historical, social, and biological issues with command and verve, but I would choose it because its persuasive power could change many people's lives for the better, both from their own point of view and from that of the world as a whole. -Ethics

*The Bizarre Careers of John R. Brinkley* - R. Alton Lee 2014-10-17

By 1926, it seemed that John R. Brinkley's experimental rejuvenation cure—transplanting goat glands into aging men—had taken the nation by storm. Never mind that "Doc" Brinkley's medical credentials were shaky at best and that he prescribed medication over the airwaves via his high-power radio stations. To most in the medical field, he was a quack. But to his many patients and listeners, he was a brilliant surgeon, a savior of their lost manhood and youth. His rogue radio stations, XER and its successor XERA, eventually broadcast at an antenna-shattering 1,000,000 watts and not only were a megaphone for Brinkley's lucrative quackery but also hosted an unprecedented number of then-unknown country musicians and other guests. *The Bizarre Careers of John R.*

Brinkley tells the story of the infamous "Goat Gland Doctor"—a controversial medical charlatan, groundbreaking radio impresario, and prescient political campaigner—and recounts his amazing rags-to-riches-to-rags career. A master manipulator and skilled con artist, Brinkley left behind a patchwork of myths and unreliable personal accounts that many writers have merely perpetuated—until now. Alton Lee brings Brinkley's infamous legacy to the forefront, exploring how he ruthlessly exploited the sexual frustrations of aging men and the general public's antipathy toward medical doctors. Lee leaves no stone unturned in this account of a man who changed the course of American institutions forever.

**Listen to This** - Alex Ross 2010-09-28

One of The Telegraph's Best Music Books 2011  
Alex Ross's award-winning international bestseller, *The Rest Is Noise: Listening to the Twentieth Century*, has become a contemporary

classic, establishing Ross as one of our most popular and acclaimed cultural historians. Listen to This, which takes its title from a beloved 2004 essay in which Ross describes his late-blooming discovery of pop music, showcases the best of his writing from more than a decade at The New Yorker. These pieces, dedicated to classical and popular artists alike, are at once erudite and lively. In a previously unpublished essay, Ross brilliantly retells hundreds of years of music history—from Renaissance dances to Led Zeppelin—through a few iconic bass lines of celebration and lament. He vibrantly sketches canonical composers such as Schubert, Verdi, and Brahms; gives us in-depth interviews with modern pop masters such as Björk and Radiohead; and introduces us to music students at a Newark high school and indie-rock hipsters in Beijing. Whether his subject is Mozart or Bob Dylan, Ross shows how music expresses the full complexity of the human condition. Witty, passionate, and brimming with insight, Listen to This teaches us how to listen more closely.

*Ekphrasis* - Murray Krieger 2019-12-01

**The Cinema of Agnès Varda** - Delphine Benezet 2014-05-20

Agnès Varda, a pioneer of the French New Wave, has been making radical films for over half a century. Many of these are considered by scholars, filmmakers, and audiences alike, as audacious, seminal, and unforgettable. This volume considers her production as a whole, revisiting overlooked films like *Mur*, *Murs/Documenteur* (1980-81), and connecting her cinema to recent installation work. This study demonstrates how Varda has resisted norms of representation and diktats of production. It also shows how she has elaborated a personal repertoire of images, characters, and settings, which all provide insight on their cultural and political contexts. The book thus offers new readings of this director's multifaceted rêveries, arguing that her work should be seen as an aesthetically influential and ethically-driven production where

cinema is both a political and collaborative practice, and a synesthetic art form.

**A Geography Of Time** - Robert N. Levine  
2008-08-01

In this engaging and spirited book, eminent social psychologist Robert Levine asks us to explore a dimension of our experience that we take for granted—our perception of time. When we travel to a different country, or even a different city in the United States, we assume that a certain amount of cultural adjustment will be required, whether it's getting used to new food or negotiating a foreign language, adapting to a different standard of living or another currency. In fact, what contributes most to our sense of disorientation is having to adapt to another culture's sense of time. Levine, who has devoted his career to studying time and the pace of life, takes us on an enchanting tour of time through the ages and around the world. As he recounts his unique experiences with humor and deep insight, we travel with him to Brazil, where to be three hours late is perfectly acceptable,

and to Japan, where he finds a sense of the long-term that is unheard of in the West. We visit communities in the United States and find that population size affects the pace of life—and even the pace of walking. We travel back in time to ancient Greece to examine early clocks and sundials, then move forward through the centuries to the beginnings of “clock time” during the Industrial Revolution. We learn that there are places in the world today where people still live according to “nature time,” the rhythm of the sun and the seasons, and “event time,” the structuring of time around happenings (when you want to make a late appointment in Burundi, you say, “I'll see you when the cows come in”). Levine raises some fascinating questions. How do we use our time? Are we being ruled by the clock? What is this doing to our cities? To our relationships? To our own bodies and psyches? Are there decisions we have made without conscious choice? Alternative tempos we might prefer? Perhaps, Levine argues, our goal should be to try to live in a “multitemporal” society, one in which we learn to move back and forth among nature time, event time, and clock time. In other words, each of us must chart our own geography of time. If we can do that, we will have achieved temporal prosperity.

**The Black Atlantic** - Paul Gilroy 1993

This text sketches a critical account of the location of black intellectuals in the modern world following the end of racial slavery. The book explores the reactions of black writers to modernity's colour-coded promises, demonstrating the value of a politicized post-modernism in re-reading black cultural politics and political culture. The lives and writings of key African Americans such as Martin Delany, W.E.B. Dubois, Frederick Douglas and Richard Wright are examined in the light of their experiences outside the US in Europe and Africa. Gilroy provides an extensive discussion of black vernacular cultures, especially music.

**Reassembling the Social** - Bruno Latour  
2007-09-06

*Reassembling the Social* is a fundamental challenge from one of the world's leading social theorists to how we understand society and the 'social'. Bruno Latour's contention is that the word 'social', as used by Social Scientists, has become laden with assumptions to the point

where it has become misnomer. When the adjective is applied to a phenomenon, it is used to indicate a stabilized state of affairs, a bundle of ties that in due course may be used to account for another phenomenon. But Latour also finds the word used as if it described a type of material, in a comparable way to an adjective such as 'wooden' or 'steely'. Rather than simply indicating what is already assembled together, it is now used in a way that makes assumptions about the nature of what is assembled. It has become a word that designates two distinct things: a process of assembling; and a type of material, distinct from others. Latour shows why 'the social' cannot be thought of as a kind of material or domain, and disputes attempts to provide a 'social explanations' of other states of affairs. While these attempts have been productive (and probably necessary) in the past, the very success of the social sciences mean that they are largely no longer so. At the present stage it is no longer possible to inspect the precise constituents entering the social domain. Latour returns to the original meaning of 'the social' to redefine the notion, and allow it to trace connections again. It will then be possible to resume the traditional goal of the social sciences, but using more refined tools. Drawing on his extensive work examining the 'assemblages' of nature, Latour finds it necessary to scrutinize thoroughly the exact content of what is assembled under the umbrella of Society. This approach, a 'sociology of associations', has become known as Actor-Network-Theory, and this book is an essential introduction both for those seeking to understand Actor-Network Theory, or the ideas of one of its most influential proponents.

**Go, Went, Gone** - Jenny Erpenbeck 2017-09-15  
An unforgettable German bestseller about the European refugee crisis: "Erpenbeck will get under your skin" (Washington Post Book World)  
Go, Went, Gone is the masterful new novel by the acclaimed German writer Jenny Erpenbeck, "one of the most significant German-language novelists of her generation" (The Millions). The novel tells the tale of Richard, a retired classics professor who lives in Berlin. His wife has died, and he lives a routine existence until one day he spies some African refugees staging a hunger strike in Alexanderplatz. Curiosity turns to

compassion and an inner transformation, as he visits their shelter, interviews them, and becomes embroiled in their harrowing fates. Go, Went, Gone is a scathing indictment of Western policy toward the European refugee crisis, but also a touching portrait of a man who finds he has more in common with the Africans than he realizes. Exquisitely translated by Susan Bernofsky, Go, Went, Gone addresses one of the most pivotal issues of our time, facing it head-on in a voice that is both nostalgic and frightening.  
**The Modernist Papers** - Fredric Jameson  
2016-03-08

Cultural critic Fredric Jameson, renowned for his incisive studies of the passage of modernism to postmodernism, returns to the movement that dramatically broke with all tradition in search of progress for the first time since his acclaimed *A Singular Modernity*. *The Modernist Papers* is a tour de force of analysis and criticism, in which Jameson brings his dynamic and acute thought to bear on the modernist literature of the nineteenth and twentieth centuries. Jameson discusses modernist poetics, including intensive discussions of the work of Baudelaire, Rimbaud, Mallarmé, Wallace Stevens, Joyce, Proust, and Thomas Mann. He explores the peculiarities of the American literary field, taking in William Carlos Williams and the American epic, and examines the language theories of Gertrude Stein. Refusing to see modernism as simply a Western phenomenon he also pays close attention to its Japanese expression; while the complexities of a late modernist representation of twentieth-century politics are articulated in a concluding section on Peter Weiss's novel *The Aesthetics of Resistance*. Challenging our previous understanding of the literature of this period, this monumental work will come to be regarded as the classic study of modernism.

*On the Threshold of Beauty* - Kees Tazelaar

2014-04-30

*On the Threshold of Beauty* is an exciting and detailed reconstruction of the emergence of electronic music in the Netherlands. Author Kees Tazelaar, composer and head of the Institute of Sonology at the Royal Conservatoire in The Hague, grippingly relates its turbulent history from the earliest beginnings. This history begins around 1930 with the studio of the Philips Physics Laboratory and the plans for the Philips pavilion at Expo 58 in Brussels. The goal was a light and sound demonstration for the general public, but the involvement of Le Corbusier, Iannis Xenakis and Edgard Varèse gave this project a highly avant-garde turn. The result, *Poème électronique*, was considered by many to be much more experimental than the music of the research laboratory. In 1960 Philips divested itself of the studio. It was absorbed into a new studio at Utrecht University, where Gottfried Michael Koenig became artistic director in 1964. Tazelaar also looks in detail at the influence wielded by the Contact Organization for Electronic Music during this period. -- Publisher.

[Listening to the Lomax Archive](#) - Jonathan Stone

2021-11-29

In 1933, John A. Lomax and his son Alan set out as emissaries for the Library of Congress to

record the folksong of the "American Negro" in several southern African American prisons. *Listening to the Lomax Archive: The Sonic Rhetorics of African American Folksong in the 1930s* asks how the Lomaxes' field recordings—including their prison recordings and a long-form oral history of jazz musician Jelly Roll Morton—contributed to a new mythology of Americana for a nation in the midst of financial, social, and identity crises. Stone argues that folksongs communicate complex historical experiences in a seemingly simple package, and can thus be a key element—a sonic rhetoric—for interpreting the ebb and flow of cultural ideals within contemporary historical moments. He contends that the Lomaxes, aware of the power of folk music, used the folksongs they collected to increase national understanding of and agency for the subjects of their recordings even as they used the recordings to advance their own careers.

*Listening to the Lomax Archive* gives readers the opportunity to listen in on these seemingly contradictory dualities, demonstrating that they are crucial to the ways that we remember and write about the subjects of the Lomaxes' archive and other repositories of historicized sound. Throughout *Listening to the Lomax Archive*, there are a number of audio resources for readers to listen to, including songs, oral histories, and radio program excerpts. Each resource is marked with a ? in the text. Visit <https://doi.org/10.3998/mpub.9871097#resource> to access this audio content.

**Practical Ethics** - Peter Singer 2011-02-21

For thirty years, Peter Singer's Practical Ethics has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to

think about how she or he ought to live.

*Liquid Modernity* - Zygmunt Bauman 2013-07-10

In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. *Liquid Modernity* concludes the analysis undertaken in Bauman's two previous books *Globalization: The Human Consequences* and *In Search of Politics*. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.
