Al-Shura: The Qur'anic Principle of Consultation - Ahmad Al-Raysuni
2011-09-30

Muslims remain largely unaware of the importance and value of the Qur'anic principle of al-Shura (mutual consultation) and the significant role it can play in the advancement and reform of Muslim society. In this work, the author attempts to introduce and examine key meanings and practices of al-Shura, trace its historical evolution, and explore ways in which the principle can be introduced, institutionalized and applied in Muslim societies. There is no doubt that al-Shura has been sidelined throughout the Muslim world and the reasons for this are both historically and politically complex. According to the author, although much has been written on the subject, in reality it has been at best ineffectively applied and at worst heedlessly ignored. Even today it is a hotly contested issue. As al-Shura is increasingly associated with democratic participation in a decision-making process, debate has ignited with critics challenging the notion of equating the principle with western notions of democracy, with others claiming that the principle allows for a meaning that breaks the grip of centralized power. These

and other issues are investigated with careful scholarship. Al-Raysuni concludes that al-Shura should be adopted as a way of life for all Muslims to protect their interests and as a vital tool for reconstruction and reform. In doing so he addresses the subject from some intriguing new angles, giving insight into areas hitherto little, if at all, examined.
Ottoman Population, 1830-1914 - Kemal H. Karpat 1985

The Golden Boat - Srecko Kosovel 2011-04-01

Just when you thought you knew it all! The first truly representative translation into English of a Central European poetic prodigy of the early twentieth century - the Slovenian Rimbaud - who died at the age of twenty-two but whose work bears comparison at once with Rilke, Ungaretti and Apollinaire, yet has its own distinctive and disarming iconoclastic vitality.

Burning House - Ann Beattie 2011-03-30

The now-classic, utterly unique voice of Ann Beattie is so dry it throws off sparks, her eye endowed with the emotional equivalent of X-ray vision. Her characters are young men and women discovering what it means to

be a grown-up in a country that promised them they'd stay young forever. And here, in shapely, penetrating stories, Beattie confirms why she is one of the most widely imitated -- yet surely inimitable -- literary stylists of her generation. In *The Burning House*, Beattie's characters go from dealing drugs to taking care of a bereaved friend. They watch their marriages fail not with a bang but with a wisecrack. And afterward, they may find themselves trading confidences with their spouses' new lovers. *The Burning House* proves that Beattie has no peer when it comes to revealing the hidden shapes of our relationships, or the depths of tenderness, grief, and anger that lie beneath the surfaces of our daily lives.

The Last Lecture - Randy Pausch 2008-04-08

"We cannot change the cards we are dealt, just how we play the hand."--- Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science

professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Postmodern Fables - Jean-Francois Lyotard 1999-04-01

This latest offering from one of the founding figures of postmodernism is a collection of fifteen "fables" that ask, in the words of Jean-Francois Lyotard, "how to live, and why?" Here, Lyotard provides a mixture of anarchistic irreverence and sober philosophical reflection on a wide range of topics with attention to issues of justice and ethics, aesthetics, and judgment. In sections titled "Verbiages, " "System Fantasies, " "Concealments, " and "Crypts, " Lyotard unravels and reconfigures idealist notions subjects as various and fascinating as the French Revolution, the Holocaust, the reception of French theory in the Anglo-American world, the events of May 1968, the Gulf War, academic travelers as intellectual tourists, the collapse of communism, and his own work in the context of others'.

Ethnonationalism - Walker Connor 2018-06-05

Walker Connor, perhaps the leading student of the origins and dynamics of ethnonationalism, has consistently stressed the importance of its political implications. In these essays, which have appeared over the course of the last three decades, he argues that Western scholars and policymakers have almost invariably underrated the influence of ethnonationalism and misinterpreted its passionate and nonrational qualities. Several of the essays have become classics: together they

represent a rigorous and stimulating attempt to establish a secure methodological foundation for the study of a complicated phenomenon increasingly, if belatedly, recognized as the major cause of global political instability. The book opens by reviewing a wide range of scholarship on ethnonationalism. Connor examines nineteenth- and early twentieth-century debate among British scholars on the viability and desirability of the multinational state, the American "nation-building" school of thought that dominated the literature on political development in the post-World War II era, and the recent explosion of literature on ethnonationalism. In the second part of the book, he shows how progress in the study of ethnonationalism has been hampered by terminological confusion, an inclination to perceive homogeneity even where heterogeneity thrives, an unwarranted tendency to seek explanation for ethnic conflict in economic differentials, and lack of historical perspective. The book closes with a consideration of the inherent limitations of rational inquiry into the realm of group-identity.

The Anthropological Field on the Margins of Europe, 1945-1991 - Aleksandar Boskovic 2013

The social lives of the peoples of the Balkans have long stimulated the imaginations of their northern European neighbors. These peoples and places have anthropological traditions of their own, shaped initially by nationalist movements and, later, by socialism and other political constraints. From an anthropological perspective, this book explores the region between Greece and Slovenia, when political pressures were

strongest in the era of the Cold War. Yet, the environments were by no means uniformly repressive. The study provides indispensable insights for new generations pursuing innovative research agendas in this region in the new century. It raises deeper issues about the boundaries and substance of the anthropological endeavor. (Series: Halle Studies in the Anthropology of Eurasia - Vol. 29)

The Claim Of Language - Christopher Fynsk 2004

In *The Claim of Language*, Christopher Fynsk clearly and eloquently defends and rearticulates the humanities from a perspective that moves beyond the political and philosophical reductions of identity politics. Leaving aside polemics, Fynsk asserts that discourses in the humanities will find real ethical-political purchase when they engage with the material events in art, literature, and social life that call for humanistic reflection.

The Siege - Ismail Kadare 2010-02-12

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. *The Siege* tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling,

The Siege is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

Teaching and the Case Method - Carl Roland Christensen 1987

Teaching and the Case Method delves into the special role of teacher and students in the case method learning process. Schools that want to use the case method more effectively can use this book to teach groups of faculty how to apply case method techniques. For the first time, too, a book about case method teaching attempts to show how the method can be applied in a liberal arts setting. A liberal arts module in the book

presents an innovative program for instructors who want to experiment with discussion teaching in traditional arts and science areas. The book focuses on a wide range of knotty problems faced by most instructors, experienced or new, creating an opportunity for them to learn from each other. It's main purpose is to provide a rich opportunity for both professional school and liberal arts instructors to develop their own discussion leadership skills, and to further the process of learning for both themselves and their students.
